[Hyperbaric oxygenation in the complex treatment of Parkinson disease]

[Article in Russian]

[Neretin VIa](#), [Lobov MA](#), [Kotov SV](#), [Cheskidova GF](#), [Molchanova GS](#).

Hyperbaric oxygenation (HBO) was used for the treatment of 64 patients suffering from parkinsonism of different etiology. HBO sessions were provided daily, 8-12 per course, the treatment pressure amounted to 1.3-2 atm exposure to 40-60 minutes. The beneficial effect was marked in 55 patients. The results of the treatment turned out better in vascular parkinsonism, in patients under 65 years, with a disease standing of 1-5 years. The akineticorigid syndrome regressed to a greater degree, whereas in trembling hyperkinesis, HBO turned out to be less potent.
